ACADEMIC DEGREE

Federal University of Campina Grande (UFCG) — bachelor in Computer Science

AUGUST OF 2020 - JUNE OF 2023 (PROBABLY)

PROJECTS

Portfolio

My personal portfolio. The main goal of the application, besides being the professional portfolio, was to put into practice **ReactJS** concepts that were learned during classes taken online. Through this project was possible to deepen the knowledge of **JavaScript**, **HTML** and **CSS**.

LabRua site

Application developed in **Gatsby** and **Prismic.io** to replace the current LabRua web site developed using the tecnologia Hugo.

AnonymousCents

This project is an application in **Python** with **Python Decouple**, **Google Sheets API**, **Google Drive API** and **Gspread API**, and was created to fix a problem of grades disponibility while taking architecture and organization of computer laboratory classes (LOAC). The Web and mobile version are in phase of the design system and design of the front-end.
